

## **LAB SESSION REPORT**

### **Work done in Lab Session:**

- I performed OOP Concepts in Dart.
- I learned about Scaffold Widget in Flutter and also implemented it in my app. This class provides APIs for showing drawers, snack bars, and bottom sheets.
- Stateless widgets: - A widget that does not require mutable (Doesn't change frequently) state.
- Stateful widgets: - Widget gets changed when the user interacts with it.

### **Plans for next week:**

- Follow the tutorial and try to implement the stuff.
